PROFESSIONAL SUMMARY

Talented developer adept at contributing to a highly collaborative work environment, finding solutions and determining customer satisfaction. Designed and developed web applications across multiple APIs, third party integration and databases. Passionate and hardworking with penchant for developing customized interfaces that factor in unique demands for accessibility, reachability and security

SKILLS AND COMPETENCY

Programming languages: Python, JavaScript

Back-end Technologies: Django, Node.js, Flask, FastAPI

Front-end stack: HTML, CSS, React.js

Databases: Postgres, Mysql

Other computing proficiencies: Docker, Message queues, authentication and authorization, git/github

Soft skills: Effective communication, self-awareness, adaptability, problem solving skills, attentive to detail

EXPERIENCE

Full stack Developer || Poultry Plus (personal project)

- Developed a web app called Poultry Plus that helps poultry farmers track their animals and finances
- Used Django and JavaScript to build the app, which include features such as authentication, chat, book keeping, death reporting and also a payment feature
- Worked independently to complete the project, demonstrating strong problem-solving and time management skills

Back-end Developer || Djurnal (personal project)

- Engineered and deployed a high-performance web application called Djurnal that allows users to journal their daily activities
- Used the Flask framework and python programming language to build the app, which includes features such as authentication, adding, deleting, updating, and viewing entries, as well as a comment feature.
- Deployed the app to production and maintained its performance with regular monitoring

Web Developer || Personal website (personal project)

- Integrated a third-party API into the React framework
- Built a visually stunning web page that increased customer engagement, boosting overall traffic.
